Hodess Cleanroom Construction is a full-service construction company based in Attleboro Falls, Massachusetts, specializing in advanced technology and cleanroom construction. Hodess designs and builds cleanrooms for industries such as Nanotechnology, Defense, Microelectronics, Pharmaceutical, Life Sciences, Biotechnology, and Medical Device companies. Hodess also has experience with Dry Rooms and Lithium-Ion Battery Dry Rooms. Cleanroom Design and Construction Hodess provides turnkey cleanroom design and building services. As an extension of your internal team, we work closely with you during the entire process. Its cleanroom management team will keep you in the loop during crucial phases of your project so that no surprises can affect your timeline or budget. Before the cleanroom construction process begins, the company analyzes your program requirements. It helps you determine the level of cleanliness necessary and the type of cleanroom that will suit your budget and needs.
