Decorative Concrete of Virginia is a full-service concrete finisher founded in 2001 that specializes in Stamped Concrete, Stamped and Sprayed Overlays, Polished Concrete, and Acid Stained Concrete. They serve Central Virginia, including Lynchburg, Bedford, Roanoke, Danville, Charlottesville, Appomattox, Wintergreen, Smith Mountain Lake, Lexington, and Richmond. Metal Essence Metallic epoxy, sometimes called Reflector Floor, is a unique product capable of producing custom one-of-a-kind floors. The 100% solids epoxy mixed with custom metal pigments create a floor as durable as beautiful. When mixed with 100% solids epoxy, the metallic pigment drifts to create a marbled semi-transparent look similar to traditional acid stains. Designed for use on old or new concrete in prestigious commercial projects and intimate residential spaces, Metallic Epoxy's unlimited design capabilities transform ordinary concrete into a limitless palette of color and design. Metallic epoxy is perfect for Basements, Garages, Showrooms, Restaurants, Shopping Centers, Plazas, Hotel Entryways, Lobbies, Foyers, Living Rooms, Kitchens, and many more.
