Braemar Building Systems supplies custom pre-engineered straight-wall buildings, metal carport structures, and steel building kits in Englewood, Colorado. Braemar's services include designing, engineering, manufacturing, and delivering complete building kits directly from the factory to you. Braemar has over 30 years of construction experience in the steel building industry, supplies steel buildings to all parts of Canada and the United States (including Alaska and Hawaii), and provides steel buildings to various parts of the Caribbean. The company works directly with building owners, contractors, and architects. Its services include designing, engineering, manufacturing, and delivering complete building kits directly from the factory to you. It will provide a free and complete quote for your building upon request. There is no cost or obligation to you for this service.
