Flatiron Construction Corp. is a general contracting firm headquartered in Broomfield, Colorado. The company specializes in heavy civil construction, transportation infrastructure, energy infrastructure, water infrastructure, design-build, construction management, and general contracting, both on a national scale and in local districts in North America. Founded in 1947, Flatiron builds roads, bridges, rail, airports, dams, industrial, water, and underground projects from common to complex, large-scale jobs. Delivering successful projects under various contracting methods, the company has a unique design-build and public-private partnership experience and expertise. Flatiron builds landmark projects from coast to coast, delivering successful transportation and infrastructure projects for clients in the U.S. and Canada.
