The Estimating Edge, LLC, headquartered in Boynton Beach, FL, offers The EDGE®, an estimating and takeoff software system built by construction estimating experts who understand your business. The system lets you directly calculate measurements from digital blueprints on your computer screen. Using The EDGE, users report their estimated output to tripled since starting the software system, and the plan ultimately pays for itself within just a few projects. The EDGE® is designed around your workflow, built by tradespeople for tradespeople, not how software people think you should estimate. The Most Robust Construction Estimating Software Solution: The EDGE® is the professional's choice for all-in-one commercial construction estimating and takeoff software. Estimating Edge's team of experienced construction professionals and software engineers has developed the industry's smartest takeoff and estimating software solutions for competitive estimates. The EDGE® is the only software for commercial roofing companies that provides an end-to-end automated solution for takeoff and estimating in a roofing software program. Don't just estimate faster. Estimate better.®
