Solar Innovations® Architectural Glazing Systems manufactures glazed structures, skylights, windows, and doors, headquartered in Pine Grove, Pennsylvania. They design, develop, and manufacture environmentally specific conservatories, greenhouses, skylights, and sunrooms. Solar Innovation is a single-source provider of custom-glazed products, including Folding Glass walls, Doors, Windows, Screens, European windows, and Door Systems. The company also offers Active/Passive energy solutions such as; PV solar electricity, Passive Solar heat & lighting, solar chimneys, solar hot water/thermal, and wind-powered electricity. Also offered are Energy Audits and Building Analyses for commercial and residential properties are also offered. Solar Innovations encourages customers to visit their corporate campus, view their manufacturing area, and meet with the entire team involved in your project. Tours of their LEED Gold Certified corporate office and manufacturing facility (featuring three working greenhouses) are available to groups, schools, colleges, and garden clubs.
