By combining the strengths of two construction platforms - GenieBelt and APROPLAN, LetsBuild offers a complementary solution for the construction phase. GenieBelt provides real-time planning and reports, while Aproplan provides on-site facility management and QHSE construction software. GenieBelt and APROPLAN join forces to create LetsBuild. By combining the strengths of GenieBelt and APROPLAN, LetsBuild enables: Project teams and workers benefit from having critical information at their fingertips and viewing tasks, reporting, and coordinating quickly, in real-time. Office-based managers maintain complete insight into progress and processes on the site while building a data foundation that enables them to make accurate decisions based on current information. LetsBuild covers the construction phase by providing the following: On-site planning and progress communication, On-site follow-up and communication. The features include: Documents and drawings, Checklists and forms, Snagging / Punchlists, Real-time schedule, Field progress reporting, Business dashboards.
