Fax: (319) 343-1038

Brava Roof Tile designs develops, and manufactures Synthetic Architectural Roofing Products in genuine profiles, including Spanish Tile, Cedar Shake, and Slate roofing. Utilizing its proprietary compression molding technology, Brava Roof Tile creates the authentic beauty of its natural counterparts in a lightweight, durable, and environmentally friendly material. Brava's roof tiles consist of 100% recycled post-industrial plastic material and have received 3rd party testing certifications for Class 4 Impact, Class A fire, and up to 150 mph wind. These composite roofing products last longer, are far more durable, and are aesthetically and architecturally pleasing than asphalt shingles, concrete tiles, slate, shake, and clay tiles. Brava composite tile is the best alternative to traditional Spanish clay, natural slate, and cedar shake roofing! The Brava Roof Tile Product Catalog offers product information, specifications, and installation instructions for roofing materials and accessories.
